

DANGER CONSTRUCTION AREA

CONFINED SPACES IN CONSTRUCTION

Competent Person must evaluate worksite and identify confined spaces, including permit spaces.

Confined space activities must be coordinated when multiple employers are on site.

Continuous atmospheric monitoring is required, whenever possible.

Continuous monitoring with early warning is required for engulfment hazards.

Permits can be suspended vs. cancelled.

Employer must confirm that emergency assistance is available in the event that non-entry rescue fails.

Employer must evaluate and select a rescue team or service that:

- Has the capability to reach the victim(s) within a time frame appropriate for the hazard(s) identified.
- Is equipped for, and proficient in, performing the needed rescue services.
- Agrees to notify the employer immediately if the rescue service becomes unavailable.
